Unregistered users.Q: Get two elements in one line using GIT on Windows I am new at using GIT. My first command on command line is: git status Then, I got a line like this # Auto-generated file. # This file is auto-generated from the current state of the repository. # Changes to this file will be overwritten when the repository is updated. # The output of 'git status --porcelain' is included in the repository and # will be overridden when the repository is updated. I only know how to use the command line to add/commit/commit. I want to know how to choose and get two elements in one line. A: You can use Git aliases. For example, to get the changes between master and staging branch and show it on one line, you can use the following: git diff master..staging --name-only The Bear Cub Jungles The Bear Cub Jungles is the debut album from American singer-songwriter Meek Mill. It was released on November 21, 2010. The album had five singles, four of which were top 40 hits on the Billboard Hot R&B/Hip-Hop Songs charts. "Back Like That" and "I
